

## NCF-30 Mold Turnover Machine

### Description:

Mold turnover machine is widely used for reversing or turning over heavy objects. It is mainly applied in mold producing industry, injection industry and die-casting industry. It is a desirable product for adjusting of large mold. Mold turnover machine can turn from 0-90 degree and its rolling capacity is 30T.

### Features:

1. The machine adopts special double chain drive, oblique gear and worm speed reducer.
2. Four-roller device is wrapped with polyamide adhesive.
3. The mold turnover machine is fast, stable and safe as it supports inverter control.
4. It adopts adjustable mechanical pressure device.
5. It has compact and durable structure and comparatively low height of bench and enough size of bench.
6. The mold turnover machine adopts magnetic motor and automatic locking in case of power off during rolling;
7. Its main parts are from famous professional manufacturers and are reliable.

## Parameter:

Model	NCF-30 industrial mold upender
Rolling capacity	30T
Time for rolling by 90	40s
Size of bench surface	2000x1720mm
Height of bench surface	870mm
External size	2000x2500x2590mm
Central size	700mm
Motor power	5.5kw
Weight of machine tool	7.5T
