

NCF-50 Mold Turnover Machine

Description:

Mold turnover machine is mainly used to reverse or turn over heavy objects, from horizontal to vertical, or from vertical to horizontal. It is widely used in die manufacturing, injection molding and die casting. The machine is the inevitable supplementary facility for the vertical die spotting machine. NCF-50 mold turnover machine with rolling capacity 50T is suitable for adjusting large mould.

Features:

1. NCF-50 mold turnover machine adopts special double chain drive, oblique gear and worm speed reducer.
2. Four-roller device is wrapped with polyamide adhesive.
3. It supports remote operation with a separated control panel.
4. NCF-50 mold turnover machine adopts magnetic motor and automatic locking in case of power off during rolling;
5. The machine is fast, stable and safe as it supports inverter control.
6. It adopts adjustable mechanical pressure device.

DONGGUAN NICE MACHINE BUILDING CO.,LTD

Address: NO.5, 1 Road Jiannan, Xiaoxiang Community, Wanjiang District, Dongguan, Guangdong.

Post Code:523048

Tel: +86-769-39012323 / 22707026 / 22707027

E-mail:nice@nicemachine.net / alice@nicemachine.net

7. Multiple position limit system can ensure safety of operation.

8. NCF-50 mold turnover machine adopts original import parts as electric components and are reliable.

Parameter:

Model	NCF-30 mold turnover machine
Rolling capacity	50T
Time for rolling by 90	50s
Size of bench surface	2200x2000mm
Height of bench surface	1000mm
External size	2200x2900x3000mm
Central size	850mm
Motor power	7.5kw
Weight of machine tool	9.8T
